Lee's Summit North Broncobots Robotics Camp 2008

## Panda-Monium

### Robotics Camp —2008—

#### Day Five: Time to Drive

Today is the final day of robotics camp fun. The kids have been practicing for the big competition today. Qualifying rounds started after snack time and the final matches will be played at the awards ceremony at 1:00 PM.

Ben of the Cyclones makes last minute preparations on their robot.

Learning and fun has been plentiful at the first LSN robotics camp ever. There has been trouble and obstacles overcome, goals have been achieved, and friendships formed. No matter what the outcome of the competition is, the accomplishments this week are outstanding. Whether their strength was building a robot or creating a functional website, all the students have been extremely successful. What a great bunch of students!

The field gets new decorations.

## Message from Staff...

Robotics Camp  
Panda-Monium

We have had the most fantastic week working with all of your kids! They are all so bright and ingenious. It was great getting to know each and every camper, and we hope to see you next year!
