

# The Bionic Titans

---

*We make robots.*

Our robot is a simple one, made to take anything you throw at it..

We have tested that it CAN drive with only 2 wheels. It is designed to score in all goals, but not necessarily with ease. But that's why we are skilled drivers. Our main scoring technique is to push balls into one of the 2 ground scoring zones. Our secondary technique is to pick up the golf balls and drop them in the cup/tee.
